18 Nov 13:45:20 - [warn]

-----  
Your flow credentials file is encrypted using a system-generated key.

If the system-generated key is lost for any reason, your credentials  
file will not be recoverable, you will have to delete it and re-enter  
your credentials.

You should set your own key using the 'credentialSecret' option in  
your settings file. Node-RED will then re-encrypt your credentials  
file using your chosen key the next time you deploy a change.
